

New York State Senate Districts and Asian Communities (2019)

Introduction

With the fastest percentage growth rates in the Asian population of New York State happening in upstate areas, this profile on the Asian communities for each of the State Senate Districts in New York State expands upon the previous brief issued in 2012, which only covered New York City.

This profile is based on the data from the 2017 5-year American Community Survey from the U.S. Census Bureau, unless otherwise noted. For each district, this brief provides a snapshot of the Asian populations including disaggregated data by Asian ethnicities, the share of immigrants that make up the Asian population, the citizen voting-age populations for Asians, and the Asian languages most commonly spoken.

Overall Asian Population

Table 1 summarizes the Asian population data by Senate Districts in New York State. According to the most recent Census Bureau population estimates, the Asian population in New York State reached 1.88 million throughout 63 districts in 2017, accounting for nearly 10 percent of the population. In 16 districts, at least one in ten residents was Asian.

Senate District (SD) 16, centered in Flushing, Queens, was the only Asian majority district. SD 11 in Northeast Queens, along the Long Island Expressway, has the second largest Asian population, and SD 22, covering Southwest Brooklyn, follows with the third largest Asian population. SD 44, which covers Albany and Rensselaer Counties has the largest Asian population outside the New York metro area, with over 22,000 Asian residents.

Table 1 also presents Asian immigrant population in 2017. Statewide, Asians comprise of 26% of all immigrants. In SD 16, Asians accounted for 69% of all immigrants, the largest percentage among all SDs. Asians in 2 other SDs in New York City, 11 and 26 (Lower Manhattan and parts of Brooklyn), also accounted for the majority of immigrants. Outside of

the New York metro area, in District 58, covering Chemung, Schuyler, Steuben, Tompkins, and Yates Counties, Asians accounted for 52% of all immigrants.

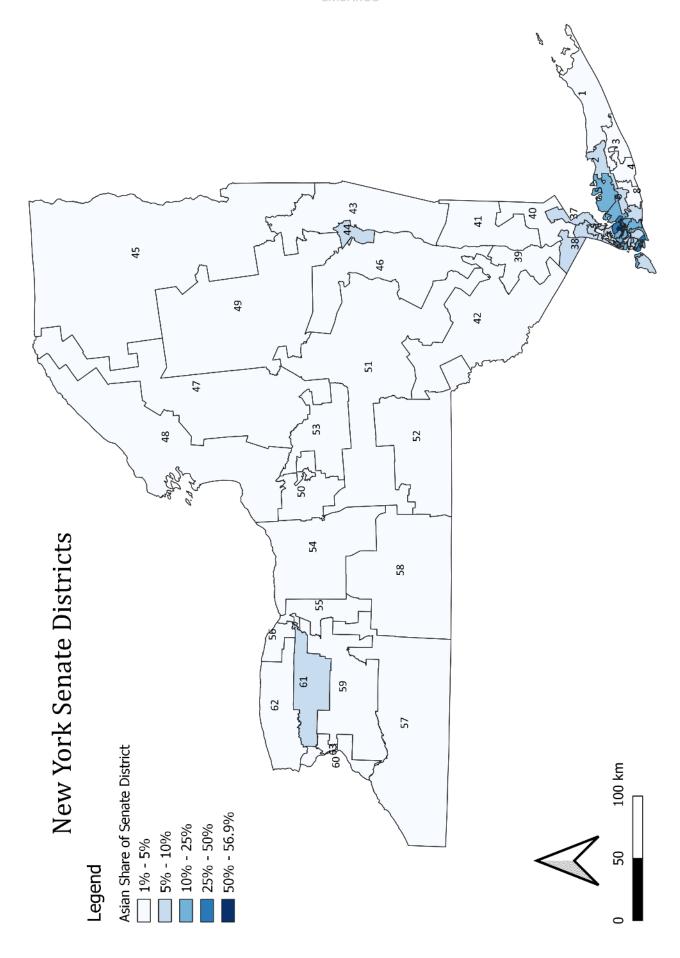

Finally, Table 1 summarizes Asian Citizen Voting-Age Population (CVAP) data from 2017. Overall, Asians comprise of 6% of the total CVAP in New York State. SD 16 has the highest percent of Asian voting-age citizens, accounting for 45% of the total CVAP in SD 16. SD 11 has the second largest percent of Asian voting-age citizens, accounting for 32% of the total CVAP while SD 22 follows with the third largest percent of Asian voting-age citizens, accounting for 23% of the total CVAP. In the New York metro area, 13 SDs had Asians making up more than 10% of the CVAP. Outside the New York metro area, SD 44 has the highest percent of Asian voting-age citizens, accounting for 4% of the total CVAP.

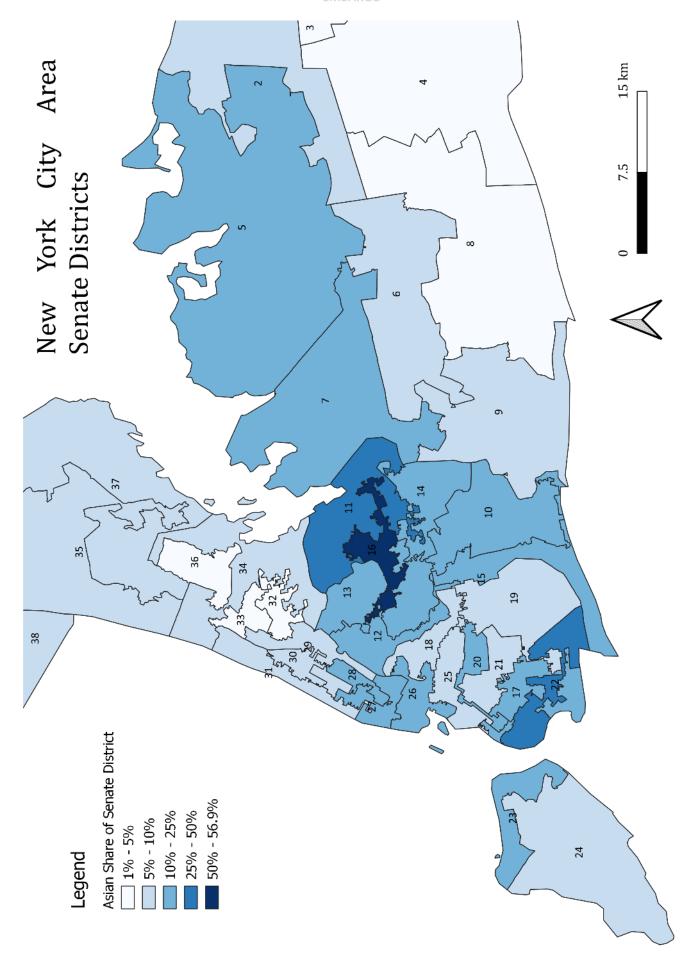

Highlights for Asian Groups

The overall Asian population numbers provide only a snapshot of the realities that Asian populations face and may disguise the diversity and disparate residential patterns of the Asian community. Table 2 presents the population for each Senate District of the eighteen largest Asian ethnic groups. This section will highlight which SDs have the most population for each of the Asian groups .

Bangladeshis were the sixth largest Asian group in the state, with more than 77,000 residents. SD 14 in Queens County had the largest Bangladeshi community with almost 12,0000 residents. Outside of the New York metro area, SD 63, covering Erie County, was the home of the largest Bangladeshi population just under 1,000 residents.

Bhutanese New Yorkers were mostly found in upstate areas, particularly in SDs 50 (suburbs of Syracuse), 56 (parts of Rochester and suburbs), and 60 (parts of Buffalo and suburbs).

Burmese residents were the tenth largest Asian group in the state, with more than 16,000 residents. Much of the Burmese population was outside of the New York metro area. SD 47, covering Lewis County, Oneida County, and St. Lawrence County, was the home of the largest Burmese population with 3,200 residents. By comparison, SD 16 in Queens had the largest Burmese community in New York City with almost 1,400 residents.

Cambodians were the fourteenth largest Asian group in the state, with 6,500 residents. SD 47 was the home of the largest Cambodian population in the state with almost 1,400 residents primarily in Utica. Within New York City, SD 36, in Bronx County, had the largest Cambodian community with just over 1,000 residents.

Chinese residents were the largest Asian group in the state, with almost 739,000 residents. D 16 had the largest Chinese community with almost 115,000 residents. Outside of the New York metro area, SD 44 centered around Albany was the home of the largest Chinese population with almost 6,800 residents.

Filipinos were the fourth largest Asian group in the state, with almost 144,000 residents. SD 16 had the largest Filipino community with over 12,000 residents. As with Chinese New Yorkers, SD 44 was the home of the largest Filipino population outside of the New York metro area with over 2,000 residents.

Indians were the second largest Asian group in the state, with nearly 410,000 residents. SD 10, in Queens County, had the largest Indian community with over 42,000 residents. Outside of the New York metro area, SD 44 was the home of the largest Indian population with over 5,500 residents.

Of the 6,300 **Indonesians** in New York State, the largest portion were in SD 16, with 1,400 residents. None of the SDs in upstate New York had more than 200 Indonesians.

Japanese residents were the seventh largest Asian group in the state, with almost 56,000 residents. SD 27, in Manhattan County, had the largest Japanese community with 5,300 residents. Outside of the New York metro area, SD 44 had the largest Japanese population with over 700 residents.

Koreans were the third largest Asian group in the state, with over 146,000 residents. SD 11 had the most Koreans at over 25,000. Outside of the New York metro area, SD 61, covering Erie, Genesee, and Monroe Counties, was the home of the largest Korean population with over 2,000 residents.

The largest **Laotian** communities (statewide population of 4,600) were found in upstate New York, particularly in SDs 52 (Broome, Chenango, Delaware and Tioga Counties) and 56 (parts of Rochester and suburbs).

Malaysian New Yorkers (statewide population of 4,000) were mostly found in New York City, particularly in SDs 11 and 16 in Queens; and 28, covering Manhattan's Upper East Side.

Nepalese residents were the twelfth largest Asian group in the state, with over 14,000 residents. SD 12 in New York City had the largest Nepalese community with 2,900 residents. Outside of the New York metro area, SD 60, covering Erie County, was the home of the largest Nepalese population with 750 residents.

Pakistani residents were the fifth largest Asian group in the state, with more than 88,000 residents. SD 17 in New York City had the largest Pakistani community with 9,900 residents. Outside of the New York metro area, SD 44 was the home of the largest Pakistani population with over 2,000 residents.

Sri Lankan residents were the thirteenth largest Asian group in the state with more than 7,000 residents. SD 24 in Staten Island had the largest Sri Lankan community with more than 1,000 residents. Outside of the New York metro area, no SD have more than 300 Sri Lankan residents.

Taiwanese residents were the ninth largest Asian group in the state with almost 17,000 residents. SD 16 had the largest Taiwanese community with 2,300 residents. Outside of the New York metro area, none of the SD had Taiwanese populations larger than 350.

Thai residents were the eleventh largest Asian group in the state with almost 15,000 residents. SD 16 had the largest Thai community with 1,400 residents. Outside of the New York metro area, SD 47 was the home of the largest Thai population with over 700 residents.

¹Chinese population in this report excludes those who identified as Taiwanese, who are tabulated separately.

Vietnamese residents were the eighth largest Asian group in the state with more than 38,000 residents. The SD in New York State with the largest Vietnamese population was outside the New York metro area in SD 56 in Monroe County with 1,900 residents. In New York City, SD 22, in Brooklyn, had the largest Vietnamese community with 1,600 residents.

Languages Spoken

Asian languages are spoken throughout the state. This section highlights some key data from Table 3 of the languages spoken by SDs. Due to new data disclosure restrictions, detailed data on Asian languages spoken by SD was last reported in the 2015 5-year American Community Survey.

Chinese was the most common Asian language spoken in the state. However, the variety of dialects spoken in the state and the usage of traditional and simplified scripts present further challenges when reaching out to the Chinese-speaking population. SD 16 in Queens had the largest Chinese-speaking population with 95,375 speakers, followed by SD 22 in Brooklyn with 64,683 Chinese speakers. Outside of the New York metro area, SD 61 had the most Chinese speakers, with 4,158 people. Among the Asian languages, Chinese was mostly commonly spoken in 45 out of 63 SDs. Fifty-five SDs had at least 1,000 Chinese speakers.

Other Indic Languages, the second most common Asian language category in the state, were represented mainly by Bengali (spoken by Indians and Bangladeshis), Punjabi (spoken by Indians and Pakistanis), and Nepali languages. SD 12 in Queens had the largest number of speakers of other Indic languages with 18,047 speakers, followed by SD 14 in Queens with 15,451. Other Indic languages were the largest Asian language group in 8 SDs. Thirty-eight SDs had over 1,000 other Indic languages speakers.

Using another Census Bureau source, the American Community Survey Public Use Microdata (ACS PUMS), we can identify the specific languages spoken in counties and large cities, but not by legislative district. Using this data source, we find that the largest population of **Bengali** speakers outside New York City was in Buffalo with 1,700 individuals. The largest **Punjabi**-speaking community upstate was in Erie County with almost 1,200 speakers. Concentrations of **Nepali** speakers could be found Syracuse (with

1,500 speakers), Monroe County (1,400), and Buffalo (almost 900).

Korean was the third most common Asian language in the state. SD 11 in Queens had the largest Korean-speaking population at 22,855 speakers, followed by SD 16 with 18,843 speakers and SD 27, in Manhattan, with 5,465. Outside of the New York metro area, SD 61 had the most Korean speakers with 1,445 speakers. Twenty-six SDs had over 1,000 Korean speakers.

Many New York residents spoke an Asian language beyond the Asian languages reported separately. These residents were grouped into the category of **Other Asian Languages**, the fourth largest Asian language group. SD 7 had the largest population with 7,082 speakers, followed by SD 12 with 4,387. Outside of the New York metro area, SD 47 had the largest population in this language category with 2,945 speakers.

Using the ACS PUMS data, we find that the "Other Asian Language" category in New York City primarily consisted of Malayalam, Tamil and Telugu, which are mostly spoken by Indians and Sri Lankans. Outside of New York City, Malayalam speakers were the largest language within this category, with populations concentrated in the suburban counties of Nassau. Rockland, and Westchester Counties with over 17,000 Malayalam speakers. Upstate counties outside of the metro area had large numbers of Karen (a group of languages spoken in southern Myanmar), Tamil, Tegulu, and Burmese. Almost 3,300 Karen speakers, primarily recently arrived refugees, were found largely in the Greater Utica and Rome area, Buffalo, Albany, Syracuse, and Rochester. About 3,100 Tamil speakers were primarily in Monroe County and the Capital Region. Over 3,000 **Tegulu** speakers were concentrated in the Capital Region, and Monroe and Erie Counties. Over 2,900 **Burmese** speakers were mostly residing in Greater Utica and Rome area and Buffalo.

Arabic was the fifth largest Asian language group in the state. SD 22 had the largest Arabic-speaking population with 14,683 speakers, followed by SD 12 in Queens at 4,758 speakers and SD 23 at 4,446 speakers. Outside of the New York metro area, SD 63 had the largest Arabic-speaking population with 2,725 speakers. Thirty-three SDs had over 1,000 Arabic speakers.

Tagalog was the sixth most common Asian language in the state. SD 16 had the largest Tagalog-speaking population with 8,092 speakers, followed by SD 12 with 5,756 speakers. Twenty-three SDs had over 1,000 Tagalog speakers. Outside of the New York metro area, SD 44, had the largest Tagalog-speaking population with 769 speakers.

Urdu was the seventh most common Asian language in the state. SDs 1 and 9 in Suffolk and Nassau County were the only counties where Urdu was the most commonly spoken Asian language. SD 17 in Brooklyn had the largest Urdu-speaking population with 7,208 speakers, followed by SD 23 in Staten Island & Brooklyn with 5,404 speakers. Outside of the New York metro area, SD 44 had the largest Urdu-speaking population with 1,396 speakers. Twenty-four SDs had at least 1,000 Urdu speakers.

Hindi, mostly spoken by Indians in the city, was the eighth most common Asian language in the state. SD 16 had the largest Hindi-speaking population with 5,106 speakers, followed by SD 7 in Nassau County with 4,451 speakers. Outside of the New York metro area, SD 61 had the largest Hindi-speaking population with 1,162 speakers. Eighteen SDs had at least 1,000 Hindi speakers.

Japanese was the ninth largest Asian language group in the state. SD 27 had the largest Japanese-speaking population with 3,731 speakers, followed by SD 28, in Manhattan with 3,173 speakers, and SD 37, in Westchester County, with 2,613 speakers. Outside of the New York metro area, SD 58 had the largest Japanese-speaking population with 428 speakers. Nine SDs had over 1,000 Japanese speakers.

Vietnamese was the tenth largest Asian language group in the state. SD 34 in the Bronx and Westchester County, SD 56 in Monroe County and SD 50, were the only counties with over 1,000 Vietnamese speakers with 1,601, 1,261 and 1,143 speakers, respectively.

Gujarati, mostly spoken by Indians in the city, was the eleventh most common Asian language in the state. SD 7 in Nassau County had the largest Gujaratispeaking population with 2,458 speakers. Outside of the New York metro area, SD 52, covering Broome County, Chenango County, Delaware County, and Tioga County, had the largest Gujarati-speaking population with 280 speakers. Three SDs had at least 1,000 Gujarati speakers.

Statewide, there were about 17,000 speakers of Khmer, Thai and Laotian, which were the remaining Asian languages that were reported separately by the Census Bureau. The SDs 47 upstate and 36 in the Bronx had the most **Khmer** speakers. The most **Thai** speakers were found in SD 16. The **Lao** speaking community were largely found in upstate districts such as SD 56, 52, 55, and 54, in order of size.

Notes

Beginning with the 2000 Census, the Census Bureau collects and reports multiple responses to the race and ethnic categories for most of their censuses and surveys. This report chose to define anyone who identifies in whole or in part as Asian to be Asian American. As a consequence, adding across race and ethnic categories in the data table presented here would result in multiracial individual being overcounted. For example, someone who identifies as Chinese and Filipino would be included in both the Chinese and the Filipino population totals in table 2. Therefore, adding the total populations for all Asian groups listed in table 2 for a district would result in a total that was higher than the actual number of Asian respondents in a district.

Many thanks to our research interns, Adria Orr. Fulton Hou, Shoyoung Shin, and Yebin Park for their invaluable contributions to this report.
